

# Sui Southern Gas Company Limited

Ref : RA/21/25

Dated : 23 February 2024

Dr. Abdul Basit Qureshi  
Sr. Registrar  
Oil & Gas Regulatory Authority  
Mauve Area, Sector G-10/4  
Islamabad.

**Subject: AMENDED - PETITION FOR ESTIMATED REVENUE REQUIREMENT (ERR)  
FY 2024-25**

Dear Sir,

Please refer to our letter RA/21/25 dated: 30 November 2023 through which the Company submitted its ERR Petition FY 2024-25 to the Authority.

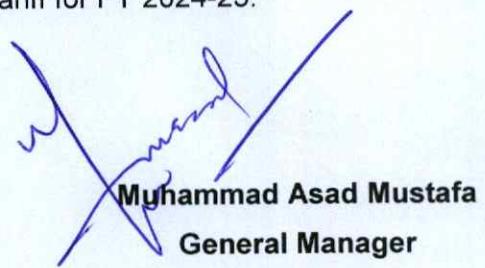

In addition to the above, the following changes have necessitated to file an amended Petition:

- 2024  
SED (Govt)  
SED (Finance)  
Dated  
Approved  
13/3/24
- 1) The selling prices have been revised as per selling price notification dated: 15 February 2024.
  - 2) The Average Prescribed Price has been revised as per OGRA determination for RERR FY 2023-24 dated: 2 February 2024.
  - 3) Opening balances of assets have been revised as per OGRA determination for RERR FY 2023-24 dated: 2 February 2024.
  - 4) The rate of return has been now based on 10% super tax instead of 4%.
  - 5) In Gas Distribution System, the 4 nos. rehabilitation projects pended by the Authority in DRERR FY 2023-24 dated: 2 February 2024 are now included in the instant petition for reduction of UFG through rehabilitation. In addition to it, 1 new reinforcement scheme i.e Master Plan for Optimization of Gas Distribution network in Hub City has been included due to uplifting of moratorium for RLNG and nominal price difference.
  - 6) R&D Projects have been newly added (**details attached as Attachment-I**):
    - a. *TBS Automation & Control –Automatic Pressure Management System (APMS) - Nos. 100 TBSs.*
    - b. *Mobile Gas Leak Detection – Ethane Detection Based Quad Bikes.*
    - c. *Path Markers (EMS) – PE Pipe Network Detection*
    - d. *Fire Fighting System –Micro encapsulation.*
    - e. *Instant Leak Repair Tapes – Underground and overhead leaks.*

- f. Ergonomically Designed Plunger Rods for Gas Leak Detection.
- g. Automatic Fire Extinguishing Ball – Fire Safety Balls.

Henceforth, Authority is requested to approve our Revised Revenue Requirement Shortfall which stands at Rs. 56,692 million or Rs. 274.40 per MMBTU in indigenous gas business and Rs. 22,935 million or Rs. 49.63 per MMBTU in the revenue requirement of RLNG business with effect from 1<sup>st</sup> July 2024 in SSGC's tariff for FY 2024-25.

**Yours sincerely,**

**Muhammad Asad Mustafa**  
General Manager  
(Tariff Dept.)  
**(For Managing Director)**

**cc: Ms. Misbah Yaqub, Senior Executive Director (Finance) OGRA**

**Mr. Shahzad Iqbal, Senior Executive Director (Gas) OGRA**

## **SUI SOUTHERN GAS COMPANY LIMITED**

### **R&D PROJECTS (Amended - ERR Petition FY 2024-25)**

#### **NEW PROJECTS/INITIATIVES**

##### ***(i) TBS Automation & Control – Automatic Pressure Management System (APMS) - Yes. 100 TBSs – Capital Budget Section - GDS***

In FY 2023-24, SSGC has successfully completed the pilot project for automating and remotely controlling 50 Town Border Stations (TBSs) in the distribution network in Karachi. Keeping in view the substantial enhancement of operational effectiveness and efficiency, SSGC plans to expand the automation infrastructure to additional 100 TBSs across the franchise area.

The project involves installation of remotely controlled pressure control valves, controllers and solar power setup along with communication and data gathering devices to ensure proper monitoring of sites from remote workstations. This project require strategic investment of **Rs. 1,000 million in FY 2024-25** leverages intelligent pressure management technology to optimize operations, minimize UFG losses, and enhance the efficiency and reliability of natural gas distribution network. Expected timeline for project completion is June 2026.

##### ***(ii) Mobile Gas Leak Detection – Ethane Detection Based Quad Bikes – Capital Budget Section – Tools & Equipment***

Traditional methane-based leak detection methods fall short of modern demands for fast, accurate, and transparent data. This presents SSGC with growing challenges in pipeline monitoring, compliance, and Unaccounted for Gas (UFG) losses due to unidentified leaks and difficulty pinpointing their sources. Narrow streets and false detections further complicate matters, requiring compact and reliable solutions.

To tackle these obstacles, SSGC aims to procure ethane-based Natural Gas Leak Detection System mounted on quad bikes. This innovative system advantages patented cavity-enhanced laser technology to directly address all key challenges:

- Double Detection: Measures both methane (CH<sub>4</sub>) and ethane (C<sub>2</sub>H<sub>6</sub>) in parts per billion (ppb), enhancing leak identification.
- Unmatched Reliability: Detects more leaks with greater confidence, minimizing false positives and negatives.
- Speed and Efficiency: Conducts surveys and reports data on the go, reaching speeds of up to 88 kph.
- Precision Targeting: Clearly distinguishes pipeline gas from other methane sources for targeted repairs.
- Comprehensive Surveys: Simultaneously scans both mains and services in a single pass, boosting efficiency.

To thoroughly evaluate the system's performance and ensure its effectiveness in the field, SSGC plans to procure **06 ethane-based Leak Detection** systems for quad bikes, with a budget of **PKR 600 million for FY 2024-25**. This investment in advanced technology will deliver significant benefits for SSGC and demonstrate its potential for wider implementation.

## **SUI SOUTHERN GAS COMPANY LIMITED**

### **R&D PROJECTS (Amended - ERR Petition FY 2024-25)**

#### *(iii) Path Markers (EMS) – PE Pipe Network Detection Capital Budget Section – Tools & Equipment*

The use of PE pipes in distribution networks has seen significant growth, with most rehabilitation or new schemes relying on the said instead of steel, except in rare cases where PE is unsuitable.

While plastic pipes offer significant benefits, their non-conductive nature poses a significant challenge when it comes to locating them underground. Traditional pipeline locators become useless, and workarounds like copper wires are vulnerable to the elements and prone to damage, potentially leading to serious consequences like service disruptions or even explosions due to mis-digs.

However, recent advancements offer a promising solution: Electronic Marking Solution (EMS) tape. These passive locator tapes, activated by a designated locator, emit signals detectable at the surface, creating a traceable path that facilitates accurate pipe location above ground. An additional advantage is the use of distinct frequencies for different utilities like water, gas, wastewater and telecom, allowing for clear differentiation.

Recognizing the importance of addressing PE network detection challenges, SSGC has incorporated EMS tapes utilization into its future network construction strategy, encompassing both rehabilitation and new projects.

To thoroughly assess the claimed performance and ensure field effectiveness, SSGC plan to execute pilot projects and procure EMS tapes worth **PKR 100 million in FY 2024-25**. The installation of EMS tapes would be incorporated in the 1,500 km rehabilitation schemes planned for FY 2024-25.

#### *(iv) Fire Fighting System – Microcapsule Capital Budget Section – Security*

Despite existing safety measures, fire hazards remain a critical threat to SSGC's assets, employees, and the public. Traditional countermeasures, often reactive, risk asset damage and injury even after fire detection.

We propose a proactive solution a novel microcapsule-based fire extinguishing system. Upon fire detection, the microcapsules burst, releasing an extinguishing agent within 7 seconds to stop the fire at its source.

This Fire Fighting System specifically targets the vulnerable 20% – distribution/junction boxes, susceptible to electrical issues and rodent damage. It comes in three versatile variants:

- FOG Stickers: Thin, reusable stickers containing fire-extinguishing gas adhere to the box interior and activate at high temperatures.
- FOG Cord: Similar principle to stickers, but for larger boxes, hung inside with clamps for easy installation.
- FOG Paint: Fire-retardant paint infused with technology, applicable to various surfaces (walls, doors, pipelines) for additional protection. This paint can be used on exit doors, valve assemblies, pits, and SMSs and TBSs pipelines for enhanced fire safety.

To evaluate the system's effectiveness, **PKR 20 million budget** is required in FY 2024-25 for a pilot project implementing.

#### *(v) Instant Leak Repair Tapes – Underground and overhead leaks Revenue Budget Section – Repair & Maintenance Head*

## **SUI SOUTHERN GAS COMPANY LIMITED**

### **R&D PROJECTS (Amended - ERR Petition FY 2024-25)**

Unaccounted for Gas (UFG) caused by leaks in underground and overhead distribution network poses significant challenges, affecting cost, safety, and repair time. Existing repair methods often require extensive resources and struggle in harsh environments. To address this, SSGC aims to undertake a pilot project utilizing a self-adhesive instant leak repair tape currently employed by leading gas companies.

Limited field tests using these tapes have shown promising results, demonstrating faster repair times compared to conventional methods. Given these initial successes, SSGC requires **PKR 10 million for FY 2024-25** to procure these instant leak repair tapes for further field testing and a comprehensive evaluation of their effectiveness in our network.

#### *(vi) Ergonomically Designed Plunger Rods for Gas Leak Detection Capital Budget Section – Tools & Equipment*

Traditional gas leak detection in distribution network relies on bulky, manually operated bar plungers, leading to operator fatigue, hindered survey progress, and increased injury risks. To address these concerns, SSGC aims to undertake a pilot project utilizing ergonomically designed plunger rods equipped with pneumatic or cordless battery operation. These advanced drills offer significant improvements: reduced operator fatigue through vibration absorption and automatic drill feeding, increased productivity due to improved comfort, ergonomic design promoting operator health and safety, and versatility with drilling capabilities across diverse materials like concrete, asphalt, brick, and dirt.

We propose procuring **20 such plunger rods** for budget of **PKR 13 million pilot project in FY 2024-25** to evaluate their effectiveness in our specific environment. By adopting this innovative solution, we aim to reduce operator injuries, improve survey efficiency, enhance worker morale, and ultimately achieve cost savings and improved safety.

#### *(vii) Automatic Fire Extinguishing Ball – Fire Safety Balls. Capital Budget Section – Security*

Fires pose a constant threat to lives, property, and the economy, causing devastating personal and social impacts. As a responsible gas utility company, SSGC prioritizes adopting cutting-edge safety technologies. While traditional fire extinguishers represent a reliable tool, their limitations include manual operation and ineffectiveness in unattended situations. Additionally, they require regular maintenance and refilling, adding further logistical hurdles.

Recognizing these limitations, SSGC is exploring innovative solutions like the Fire Extinguishing Ball. This "smart ball" represents a leap forward in fire safety. Upon contact with flames or significant temperature increases, it self-activates within 3 seconds, dispersing fire-suppressing chemicals. This automatic feature allows for placement in high-risk areas like electrical panels, buildings, and storage facilities. Furthermore, the ball emits a loud alarm, alerting individuals to the fire. Notably, the ball requires no special training to operate and boasts a 5-year lifespan with no mandatory inspections or maintenance, offering a simple and reliable safety solution.

Encouraged by promising initial tests, SSGC plans to procure and install **400 Fire Extinguishing Balls** of approximate budget **PKR 10 million** across its critical facilities in FY 2024-25. This pilot project will enable a comprehensive evaluation of the solution's efficacy within our specific operational environment.

Minimum charge (Rs. per month)	1,466.40	575.36	2,041.76	
28,898.00			28,898.00	

**Note:-**

- Upward adjustment of Rs. 274.4 per MMBTU for FY 2024-25 has been re-worked at Rs 575.36 per MMBTU with the consideration that effect of price adjustment not to pass on to domestic, special commercial (roti tandoors) customers and feedstock of fertilizer industry. However, OGRA & GOP are authorized to rework these numbers according to their policies and as per the provisions of Section 8 of OGRA Ordinance, 2002 (XVII of 2002).

- Minimum charges as per consumer price notifications dated 08 November 2023 issued by the Authority.

## PUBLIC HEARING NOTICE

### Petition Filed by Sui Southern Gas Company Limited for Determination of its Estimated Revenue Requirement/Prescribed Prices for F.Y. 2024-25

Sui Southern Gas Company Limited (the Petitioner) filed a petition before the Authority on November 30, 2023 and amended petition on February 23, 2024 under Section 8 (1) of the Oil and Gas Regulatory Authority Ordinance, 2002, read with Rule 4 (2) of the Natural Gas Tariff Rules, 2002 for Determination of its Estimated Revenue Requirement / prescribed price for FY 2024-25. The Petitioner has projected average prescribed price Rs. 1,740.80 per MMBTU for FY 2024-25 in natural gas business. Activity-wise shortfall in respect of Revenue Requirement of indigenous gas is tabulated below.

PARTICULARS	Transmission Activities	Distribution & Sales Activities	Total
			Rs. in Million
Sales Volume (BBTU)	-	206,602	206,602
Cost of Gas	-	270,980	270,980
Transmission & Distribution Cost including other charges	5,480	30,688	36,168
Depreciation	968	8,992	9,960
Adjustment for revenue shortfall in Baluchistan	-	20,929	20,929
Financial Charges on short term borrowing	2,590	9,910	12,500
Return on Assets	7,401	17,961	25,362
Subsidy for LPG Air-Mix Projects	-	3,134	3,134
Adjustment for UFG above benchmark	-	(14,652)	(14,652)
Other Operating Income	-	(4,729)	(4,729)
<b>Total Revenue Requirement</b>	<b>16,439</b>	<b>343,213</b>	<b>359,652</b>
Sale Revenue at current Prescribed Price	-	302,961	302,961
<b>Shortfall in Revenue Requirement for FY 2024-25</b>	<b>16,439</b>	<b>40,251</b>	<b>56,692</b>
<b>Increase in Revenue Requirement w.e.f. 1<sup>st</sup> July, 2024</b>	<b>79.57</b>	<b>194.83</b>	<b>274.40</b>
<b>(Rs./MMBTU)</b>			
<b>Average prescribed price (Rs. /MMBTU) w.e.f. July 01, 2024</b>			<b>1,740.80</b>

The Revenue Requirement of the petitioner will enable it to meet cost of gas, operating cost and return on assets. The cost of gas is linked to the international price of crude oil / fuel oil in accordance with the agreements between the Federal Government and the gas producers.

Besides above, the petitioner has projected RLNG cost of service at Rs. 39.56 per MMBTU for RLNG business.

Exclusive rights held by the petitioner in its franchise areas i.e. Sindh and Balochistan have expired as per the respective license, however the Petitioner has projected Rs.1402 million for laying of 179 km. distribution mains to connect various new towns and villages.

The additional issues are as follows:

- Whether projection in gas supplies volume from local gas fields is fair and reasonable? Any steps / measures taken by Petitioner to meet country's increasing energy demand?
- Reasons and justification for projecting Transmission & Distribution costs including other charges at Rs 36.168 million for FY 2024-25. Explain the steps taken by the Petitioner on cost curtailment in the light of Federal Governments directions for austerity drive as well as decreasing indigenous gas supplies.
- Reason for not projecting "Pipeline Transportation income" as part of Tariff calculation, despite the promulgation of TPA Rules, 2018? Also, elaborate concrete efforts made by the company to attract private shipper to utilize the surplus/idle Pipeline capacity, keeping in view the scarcity of the natural gas in the country.
- Concrete steps taken by the Petitioner to improve corporate governance in terms of reduced litigation, consumer complaints and improvement in customer services.
- Whether the claim of the Petitioner/Company for addition of 25,000 Nos new domestic connections on indigenous gas is justified since continuity and security of gas supply to existing as well as prospective consumers has to be ensured and Govt has already imposed moratorium on execution of gas development schemes... and provision of new domestic gas connections?
- Whether the Company's proposed Gas Distribution System amounting to Rs 46,113 million is prudent, considering the fact that SSGCL no longer holds exclusively to develop gas schemes in its franchised area of Sindh and Balochistan provinces?
- Necessity of laying of transmission lines proposed to be executed in the said year, when the indigenous gas supplies are already on the decline?
- Whether the claimed capital expenditure amounting to Rs 84,078 million against cost effective & economically efficient inclusion in the rate base?
- Whether the expenses of Rs 29,715 million claimed against UFG controlled activities are justified in view of 12.10% UFG projected by the Company?
- What specific measures SSGC must take to reduce UFG particularly in its area of operation, where the menace of theft of gas and gas leakage is reportedly on higher side?

Oil & Gas Regulatory Authority invites all interested/affected persons including gas consumers and general public to furnish their comments, suggestions and intervention requests. All correspondence in this connection may be addressed to Registrar, OGRA and should contain the names and addresses of applicants.

All intervenors must indicate the manner in which they are likely to be affected by determination of the Authority in this case. Intervention request should be accompanied by an affidavit verifying the contents of the intervention and intervention fee of Rs.500/- (demand draft in favour of OGRA) and authority letter if representing any organization.

Copy of the petition is available on OGRA's official website which can also be obtained on payment of prescribed charges of Rs.2/- per page from the office of Registrar, OGRA, Islamabad. For any information required from the Petitioner, please contact:
