NATURAL GAS QUALITY SPECIFICATIONS

The Oil and Gas Regulatory Authority (OGRA) has decided to revise the natural gas specifications to the extent of Wobbe Index only, in the light of the input of Gas Producers and Gas Utility Companies. Wobbe Index, being directly proportional to the GCV of the area, therefore in line with the GCV, the upper limit cap on the value of Wobbe Index has been removed; however, the lower limit of Wobbe Index i.e. 1180 BTU/SCF corresponding to GCV of 900 BTU/SCF, has been maintained. The Authority has also advised both the Gas Utility Companies, vis SNGPL and SSGCL, to print the value of Wobbe Index on Gas Bills for awareness of the consumers in future.
