January 11, 2023

Installation of Conical Baffle in Geysers has been approved by OGRA.

Islamabad – OGRA has made the installation of conical baffles mandatory in existing geysers and in new geysers.

The decision was taken purely in consideration to conserve the energy and eliminate the gas shortages in the country.

The installation of Conical Baffles will result in 20% - 25% saving in gas bills consumed due to use of geyser and will as such help in mitigating the ongoing natural gas crisis in the country. The total number of gas consumers in the country are 10.65 million (SNGPL: 7.45 million & SSGC: 3.2 million) and 3.088 million consumers are connected with geysers. Total approximate savings in gas will be 6.4 MMCFD per day with the help of this initiative. The deadline set for installation of conical baffles is December 2023.

OGRA conducted a public hearing on the petition of SNGPL and SSGCL, submitted as per directions of Federal Government, for the amendment in standard gas/RLNG supply contract for domestic and commercial use.
